To whom it may concern:

I am writing this letter in reference to Pro Lift Crane Service.

We have had Ward Coffman and his crews here on numerous occasions and words cannot express the appreciation of the work that they have performed.

We have used them for lifting equipment (tanks & condensers) to moving large heavy pieces of production equipment into our facility. In a panic situation that had our operation shut down I reached out to them at the end of the day (5PM) and Ward was on the job with a crew in short order. They stayed with us until 12:30 AM and were able to provide the equipment and support needed to get us back on line.

On top of the outstanding work they are very fair and reasonable with their rates. If you have a job that requires crane work or just moving equipment Pro Lift Crane will do you right!!

Thank you Ward and your team you guys rock!!!
